Summer Work - Social Studies 7 & 8 The Map of the United States

Students entering 7th and 8th grade are required to learn the map of the United States. Given a blank map of our country, students should be able to write the names of every state in their proper location.

There are many resources available online that provide interactive practice activities to help you learn the names and places of all the states in the U.S.A.

Some suggested websites to practice naming the states:

Sheppard Software at https://www.sheppardsoftware.com/web_games.htm

World Geography Games at https://world-geography-games.com/en/america_usa.html

U.S. Bureau of Labor Statistics at <https://www.bls.gov/k12/games/geography-quiz/>

Students will be tested on the U.S. map upon return to school in the fall.
