

THE CASE OF THE TRICKY TEACHER

Word Problems

At Tale Town Elementary School, the mystery of the silly tricks in the classroom has been driving everyone crazy. Who could be doing this? Of course, the teachers have denied it. But someone with access to the classrooms has to be behind it, right?

Since the first day back at school, there's a new trick waiting for everyone every day. Sometimes it's a silly poster on the board, a broken bell, or a chair that's turned upside down. But no one knows who is doing it or why. Please help!

Instructions: Solve the math questions and eliminate each box image that contains a matching answer. The last tile image left uncrossed on the page is the mystery solution.

WHICH teacher is behind the classroom tricks?

 Sir Shark 63	 Mr. Grizzly 35	 Miss Kitkat 78	 Mr. Bark 82	 Professor Squeak 18
 Mr. Tabby 48	 Ms. Fox 45	 Mr. Roar 19	 Mr. Wolf 40	 Hooty 25

There were 60 pencils and 35 crayons. How many more pencils are there than crayons? _____

Lola found 48 paintbrushes in the art room. Mr. Gordon said there should be a total of 67 paintbrushes. How many paintbrushes were missing? _____

There were 70 books on the shelf and Yasmin added 16 more books to the shelf. Then a student borrowed 8 books. How many books were left on the shelf? _____

Last week, Jye came into the library and borrowed 23 books. This week he returned 14 books and borrowed 9 more. How many books is Jye keeping at home? _____

At lunch time, the cafeteria received 92 orders for pies, but the kitchen only made 44 pies. How many orders are missed? _____

In the school's chess club, there are 15 third-graders, 25 fourth-graders, and 42 fifth-graders. How many students are in the chess club? _____

Arla ordered 78 costumes for the dance show. However, 15 costumes shrunk and cannot be used. How many costumes are left? _____

There are 35 students in Ms. Grumpy's class. Ms. Grumpy ordered 80 pencils for her students, but 5 of them arrived broken. After she gives her students 1 pencil each, how many pencils are left? _____

Mr. Wolf had 53 pairs of scissors. A group of students borrowed 19 pairs for a project, but only returned 11 pairs. How many pairs of scissors does Mr. Wolf have left?

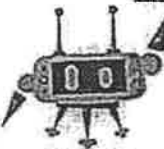

THE CASE OF THE BOOK BURGLAR

Adding & Subtracting
(No Regrouping)

The school book burglar was a mystery to the students and staff of Tale Town Elementary school. No one knew who they were or what their motive was. Every day, several books would go missing from the library or classroom. The school board had tried everything to catch the thief, but they were always one step ahead. A brilliant detective is needed to discover the Book Burglar!

THE CASE OF THE CAFETERIA CHAOS

Word Problems

In the case of the Cafeteria Chaos, the culprit was still at large. But, unfortunately, the police had no clues as to who could have done such a thing at Mathhattan Elementary School. Their only evidence was a video of the incident, which showed a figure in a black cloak sneaking into the kitchen and wreaking havoc. Food was left everywhere, and the criminal broke several kitchen appliances. So, Detective, the school needs your help. Who is the one that caused this disaster?

Instructions: Solve the math questions and eliminate each box image that contains a matching answer. The last tile image left uncrossed on the page is the mystery solution

WHO is the cafeteria chaos criminal?

 <p>Professor Crank</p> <p>40</p>	 <p>Gretel</p> <p>74</p>	 <p>Mr. Wolf</p> <p>90</p>	 <p>Dan the Dragon</p> <p>80</p>	 <p>Flynn the Fairy</p> <p>25</p>

THE CASE OF THE KIDNAPPED PRINCIPAL

Addition with Regrouping

It was the first day back at school and everyone was in a panic. Someone kidnapped Principal Plum from Readville Elementary School! The last person to see him was Ms. Lemons. She said that he was making coffee in the staffroom. No one heard or saw anything else. But, the police found a ransom note on Principal Plum's desk. The message demanded one million dollars by the end of the school day in exchange for releasing the principal. The board met to discuss their options and quickly realized they didn't have the money. Instead, they need a speedy and hard-working detective to help them solve who kidnapped Principal Plum!

Instructions: Solve the math questions and eliminate each box image that contains a matching answer. The last tile image left uncrossed on the page is the mystery solution.

WHO kidnapped Principal Plum?

THE CASE OF THE TEACHER TROLL

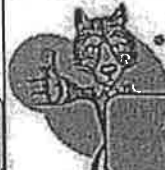

Read & Write Time

Everyone recently returned to school after the holidays, and they were shocked to hear the news that one of the teachers at the school is not a human but a troll in disguise! But who was it? The suspects were plentiful, but no one could be sure who the troll was.

Some speculated that it was Ms. Chan always looking for a good laugh at the expense of her students. Others thought that maybe it was Professor Crank, always grumpy and ready to snap at anyone. Or perhaps it was Mr. Gordon, always taking things too seriously? The list went on and on. So, we need a detective to narrow it down and solve who the Teacher Troll is.

Instructions: Solve the math questions and eliminate each box image that contains a matching answer. The last tile image left uncrossed on the page is the mystery solution.

WHO is the teacher troll in disguise?

THE CASE OF THE CRAYON CRIMINAL

Subtraction with Regrouping

The Crayon Criminal was starting to frustrate everyone at school. Every day lots of crayons were broken into tiny pieces and scattered throughout many classrooms. No matter how often the teachers asked the students to be careful with their supplies, the crayon criminal kept stealing and breaking them! Was it one of the students or teachers, or could it be an outsider sneaking into the school? One thing is for sure, the school needs a brilliant detective to help crack this crayon case before everyone goes crazy with this situation.

THE CASE OF THE STOLEN PENCIL CASE

Read Bar Graphs

Bernie was devastated when she realized her pencil case was missing. She had loved that case for years, and now it was gone – stolen right out of her locker! She searched through her backpack and the school building but couldn't find it anywhere.

She asked her friends if they had seen anything, but no one had! Then, the next day, Bernie found a note in her locker saying, "Haha! You'll never get your pencil case back!" This message confirmed Bernie's suspicions that her pencil case indeed was stolen! So, she is looking for a brilliant detective to help her solve this mystery.
